

Code-Layout, Readability and Reusability

Date	30 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the OptiCrop codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes/No/Partial)	Remarks
1	Consistent Indentation	Uniform 4-space indentation used throughout Python and HTML code	Yes	PEP8 compliant
2	Proper File Structure	Files organized into main folder and templates/ subfolder logically	Yes	Clean structure
3	Meaningful Variable Names	Variables like x_train, y_pred, int_features clearly reflect purpose	Yes	Self-documenting
4	Function / Method Names	Flask routes named home(), about(), findyourcrop(), predict() descriptively	Yes	Clear naming
5	Code Comments	Inline comments explain ML steps, data preprocessing, and Flask routes	Yes	Well documented
6	Modular Design	Code split into separate functions for each route and ML prediction logic	Yes	Reusable modules
7	No Redundant Code	Duplicate or unused imports and variables removed from final codebase	Yes	Clean code

8	Error Handling	warnings.filterwarnings() used; try-except can be added for production	Partial	Basic handling
---	----------------	--	---------	----------------

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level
1	Data Preprocessing Pipeline	Python, Pandas	OptiCrop.ipynb — Epic 3 tasks	High
2	ML Model Training Module	Python, Scikit-learn	OptiCrop.ipynb — Epic 4 tasks	High

3	Pickle Model Serialization	Python, Pickle	Notebook + Flask app.py	High
4	Flask Prediction Route	Python, Flask	app.py — /predict endpoint	High
5	HTML Form Template	HTML5, Bootstrap	findyourcrop.html	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well-organized with clear separation of notebook, Flask app, and HTML templates
Readability	5	Meaningful variable names, inline comments, and clean indentation throughout
Reusability	4	ML pipeline and Flask routes are modular and reusable; can be extended easily
Documentation / Comments	4	Good inline comments; README and setup instructions provided in GitHub
Overall Score	4.5/5	High quality codebase suitable for agricultural ML deployment
